10. Emergency Contact Numbers for Ambulance	27
11. Emergency Contact Numbers- Doctors& Police	27

## Chapter 1

### Vision & Goals

The key planning documents of various transport systems were reviewed, and the views of the key stakeholders ie students, parents, faculties, and college staff, were taken into account for the purpose of developing the vision & mission of the College Transport System. As a result, a four element vision was extracted as follows:

1. To provide safe, efficient, and high quality commuting alternative to the students, staff & faculty.
2. To facilitate mobility and college access to the students, staff and faculty
3. To provide hygienic, non-smoking vehicles,
4. To minimize the impact on traffic overcrowding and the environment

To realize the above vision, the following goals were determined by the college authorities:

1. The College buses adhere to the safety standards established for the purpose.
2. Buses operate in timely manner to avoid delays and congestion around the college.
3. Buses should implement bus stops to improve efficiency
4. Equipping the buses with safety equipment.

The transport system of the college works as a comprehensive system with various components. The sets of initiatives taken shall be chosen based on gaining greatest synergies, and achieving the vision.

Next, let us focus on the organizational structure of the transport department. The structure shall help us understand the various bodies that must act in co-ordination as a team, to ensure the accomplishment of the vision and goals of the system.
